## MICROCAT<sup>®</sup>-TM

### Micronutrient Blend for Wastewater Biodegradation

#### Description

**MICROCAT-TM** is a specialty blend of micronutrients and microbial growth enhancers for use in stimulating biological activity in soils and wastewaters. **MICROCAT-TM** provides a unique, balanced blend of minerals and vitamins. It is formulated specifically for use with **MICROCAT** microbial inocula, buffering agents and surfactants to enhance the rate and consistency of biological processing of soils and contaminated waters.

#### Applications

Contaminated wastewater or soil that is deficient in minerals or vitamins may not provide the essential ingredients for optimum biodegradation of the contaminants. Industrial wastewaters and leached soils are especially prone to deficiency of one or more specific minerals or vitamins. Stimulation of microbial activity and enhancement of the treatment effectiveness after addition of **MICROCAT-TM** is a confirmation that such a deficiency is present.

## Product Characteristics

Appearance	Tan powder
Contents	Calcium and magnesium carbonates, iron salts and organic nutrients
Shelf Life	Five Years
Packaging	Twenty-five pound (11.3 Kg) plastic pails/220 Lb (100 Kg) fiber drums

## Application Programs

**MICROCAT-TM** is applied at the rate of 1 to 5 pounds per MGD of flow per day for wastewater. Add 0.5 pounds per cubic yard of soil for bioremediation applications. Specific application rates may be determined by treatability testing. Contact your Bioscience, Inc. Technical Representative to prepare a detailed coordinated application program to fit your site remediation program.

## Optimal Application Conditions

For best results, apply this product under the following conditions:

CONDITION	RANGE	OPTIMUM
pH	6 – 9	7
Temperature	10 – 40	35

If you are operating outside these ranges, contact your Bioscience, Inc. Technical Representative for recommendations.

## Storage and Handling

Storage	45° - 105° F (7° - 40° C) Dry conditions; DO NOT FREEZE.
Handling	CAUTION: Avoid inhalation of dry powder or liquid mist. Avoid exposing skin to dry powder or strong solution as irritation may result. If material contacts skin or eyes, flush thoroughly and repeatedly with water.
